Understand Alliant Energy’s in f ow out f ow

Will my solar energy system be included in the in f ow out f ow tari f ?

- Yes. Interconnection applications received after Dec. 30, 2020, are included in the in f ow out f ow tari f . (Interconnection applications completed before Dec. 30, 2020, are subject to the previous net metering pilot.)

Am I eligible for the tari f ?

- All of Alliant Energy’s Iowa electric customers – residential, commercial and industrial (general service and large general service) – are eligible for the tari f up to 110% of the customer’s annual electricity usage, not to exceed 1 megawatt (MW) AC nameplate capacity.

What if my system is larger thanl f l D x how much your system exceeds 110% or 1MW of

power delivered to your meter during each 1 9 1 minute interval of the billing per(iod ow) .

- Alliant Energy credits you the kWh retail volumetric rate (including riders) for all net power delivered to the grid during each 15-minute interval of the billing period **(out f ow)** .

Is there a bank?

- Yes. The energy out f ow is credited at the kWh retail volumetric rate. If there is a billing month where your out f ow credit your kWh r exug ped
- However, any excess credits at the end of the annual period (either January or April) will be forfeited. The forfeited excess credits will serve to reduce purchased power expenses for all customers.

How big can I build my solar energy system?

- You can build as large a system as you want, within safety or operational constraints. We do not restrict the size of your distributed generation (DG) facility. However, only a

What if I’m a new customer and don’t have 12 months of usage?

- We’ll use any documentation you have that estimates your annual usage. We recommend you provide documentation from your electrician or homebuilder to estimate the electrical load for your new home or building.

What happens if my load changes?

- Alliant Energy will evaluate the information at the time of the interconnection application based on requirements of the inﬂow outﬂow rate schedule. If your future usage proﬁle changes, ement - = ӟ l ȡ ʊ ӿ

Can I use the outflow from one meter to offset the inflow from another meter (or meters) on the same or different locations? Will the 110% eligibility be based on combined usage?

- No. You may only utilize the inflow outflow rate schedule for the meter at which the DG facility is located and interconnected.

Can I remove meters and combine services on my property? Will the 110% eligibility be based on the combined usage?

- You may combine services on the same property, and the eligibility will be based on the combined usage. You will need to communicate this in the interconnection application.
- Please note, you should notify Alliant Energy Customer Service and Field Operations of any intention to remove or combine services. This information is not automatically communicated to these groups through the interconnection process. Please contact Customer Service at 1-800-255-4268 or customercare@alliantenergy.com before you make any changes.
